

Journal of Membrane Science and Research

Aims and Scope

The *Journal of Membrane Science and Research* (JMSR) is currently the only Open Access journal with completely Free of Charge publication policy, which provides a focal point for academic and industrial chemical and polymer engineers, chemists, materials scientists, and membranologists working on both membranes and membrane processes, particularly for four major sectors, including **Energy, Water, Environment and Food**.

Primary emphasis is on structure, function, and performance of essentially **non-biological** membranes. JMSR publishes Full Text Papers, State-of-the-Art Reviews (which should not only summarize the key research contributions in a membrane subject, they should also provide critical evaluation of the scientific literature), Letters to the Editor, Research Notes, Perspectives (which should provide a focused discussion of an important area of membranes, either related to the science or technology of membranes, emphasizing recent developments, future challenges, and/or new opportunities) and Short Communications.

JMSR calls for papers that cover all aspects of membranes and membrane processes, except biological membranes.

Editor-in-Chief

Ali Kargari; Membrane Processes Research Laboratory (MPRL), Department of Chemical Engineering, Amirkabir University of Technology (Tehran Polytechnic), Tehran, Iran, e-mail: kargari@aut.ac.ir.

Advisory Board Members

Chung, Neal Tai-Shung; National University of Singapore (NUS), Singapore, e-mail: chencts@nus.edu.sg.
