
AIM AND SCOPE

The Journal of Membrane Science and Research (JMSR) is an international scientific journal with completely **Free-of-Charge** publication policy, which provides a focal point for academic and industrial chemical, material and polymer engineers and scientists, chemists and membranologists working on both membranes and membrane processes, particularly for four major sectors, including *Energy, Water, Environment* and *Food*. The journal publishes original research and review papers. Primary emphasis is on structure, function, and performance of essentially **non-biological** membranes. The Journal of Membrane Science and Research publishes full text papers, state-of-the-art reviews, letters to the editor, and short communications.
